4. George Mason University, Worldwide Sexual Assault Statistics, 2005.
5. I have been violently assaulted four times: an attempted gang rape in Manhattan, an intruder who came through an open window one sultry summer night and was frightened out his erection by my blood-curdling scream, a doctor who blythly told me my cervix had no nerves so I couldn't be in pain from what he was doing (I was!), and the obstetrician who shoved my baby's head back in so he could do an episiotomy. Note that I repelled the rapists but not the medical professionals.

26. In the course of investigating for this book, I read many pages of accounts of young women who claim to have had their lives ruined by reactions to Gardasil. Yet I found few mentions of such life-threatening reactions in the medical literature. As with all drugs, there is a risk-to-reward ratio that varies from person to person and from situation to situation. What is your risk? Your daughter's? What else can you do to prevent cervical cancer?

Uterus

Menstruation

Some euphemisms for menstruation: Auntie Flo; the Red Sox have a home game; riding the crimson tide; the English are coming; saddling up old rusty; wearing the red badge of courage; having ketchup with your steak; are there communists in the fun house?

- *Marked in the Flesh: Circumcision from ancient Judea to Modern America*, Leonard B. Glick, Oxford University Press, 2005.

“With regard to circumcision, one of the reasons for it is, in my opinion, the wish to bring about a decrease in sexual intercourse and a weakening of the organ in question, so that . . . the organ be in as quiet a state as possible. . . . if at birth this member has been made to bleed and has had its covering taken away from it, it must indubitably be weakened.” Maimonides, *Guide to the Perplexed* (Quoted in *God is Not Great*, Christopher Hitchens, Twelve, 2007.)
